

FORTHCOMING PAPERS IN THE JOURNAL OF STEROID BIOCHEMISTRY

- RENNIE P. S., BRUCHOVSKY N. and HOOK S. L.: Androgenic regulation of tissue specific isoenzyme of acid phosphatase in rat ventral prostate
- LAMARTINIERE C. A. and LUCIER G. W.: Programming of hepatic histidase following prenatal administration of diethylstilbestrol
- POLITIS G. and CATSOULACOS P.: Effects of homo-AZA-steroidal ester of *p*-bis(2-chloroethyl)amino phenyl acetic acid on lymphocytes stimulated with phytohemagglutinin *in vitro*
- BLOHM T. R. and LAUGHLIN M. E.: Androgen metabolism in adipose tissue: conversion of 5 α -androstane-3 α ,17 β -diol by hamster tissue
- FRIDMAN O., FOGLIA V. G. and DE NICOLA A. F.: Reduction in [³H]-corticosterone binding to cytoplasmic receptors in the brain of diabetic rats
- JEANNIN J. F., BOURNOT P., MAUME G. and MAUME B. F.: Détermination simultanée d'androgènes plasmatiques chez le rat par fragmentographie de masse et dilution isotopique
- MORERA A. M., AUDI L., BERTRAND J. and SAEZ J. M.: Estrogen-like compounds and progesterone in male and female rats before puberty. I. Pattern and origin.
- AUDI L., MORERA A. M., BERTRAND J. and SAEZ J. M.: Estrogen-like compounds and progesterone in male and female rats before puberty. II. Effects of the administration of ACTH, steroidogenesis inhibitors, dexamethasone, and hCG
- LUCISANO A., DELL'ACQUA S., MONTEMURRO A., ROSSETTI A., CINQUE B., LAFUENTI G., ARNO E. and BOMPIANI A.: Peripheral and ovarian vein plasma levels of 20 α -dihydroprogesterone in women with normal menstrual cycles
- IOANNESYANTS I. A., ADLER V. V., NARIMOV M., KADAGIDZE Z. G. and SHAPOT V. S.: Sensitivity of lymphocytes to glucocorticoids
- TABEI T., MICKELSON K. E., NEUHAUS S. and PETRA P. H.: Sex steroid binding protein (SBP) in dog plasma
- HOLLAND O. B., GODEZ-SANCHEZ C. E. and MILEWICH L.: Plasma dehydroepiandrosterone sulfate concentration in essential hypertension
- SULON J., DEMEY-PONSART L., BEAUDUIN P. and SODOYEZ J. C.: Radioimmunoassay of corticosterone, cortisol and cortisone: their application to human cord and maternal plasma
- VINSON G. P., WHITEHOUSE B. J. and GODDARD C.: Steroid 17-hydroxylation and androgen production by incubated rat adrenal tissue
- BLOMQUIST C. H., KOTTS C. E. and HAKANSON E. Y.: Modification of the kinetic properties of Sene, 3 β -hydroxysteroid dehydrogenase of human placental microsomes by hydrogen peroxide and 2-mercaptoethanol
- VINSON G. P., GODDARD C. and WHITEHOUSE B. J.: Corticosteroid production *in vitro* by adrenal tissue from rats with inherited hypothalamic diabetes insipidus (Brattleboro strain)
- REICHMAN M. E. and VILLEE C. A.: Estradiol binding by rat thymus cytosol
- TOMOYAMA J., KUWATA M., FUKUDA S. and MATSUMOTO K.: Progesterone metabolism *in vitro* by ovaries from androgen-sterilized rats of different ages
- ATRAT P., DEPPMEYER V. und HÖRHDOLD C.: Steroidum wandelnde Enzyme aus Mikroorganismen—VIII. Einfluß organischer Lösungsmittel unterschiedlicher Hydrophobizität auf die Bindung an der Affinitäts-Matrix-Affinitäts-Schromatographie einer 4-en-3-oxo-Steroid: (Akzeptor)-1-en-Oxidoreduktase aus *Nocardia opaca*.
