

Erratum

The use of DSC to determine the Curie temperature of metallic glasses, by A.L. Greer, *Thermochim. Acta*, 42 (1980) 193–222.

Due to an arithmetical error, the values of ΔT_S quoted in this paper are too high by a factor of 5.344 and consequently the values of R_S/R_D are too low by the same factor. The values of R_S/R_D should be amended in Fig. 8, and in Sect. 3.5 R_S/R_D should be 1.50, not 0.28 as given. These compensating changes leave unaffected all the other numerical results and all the conclusions of the paper.
