

Forthcoming Papers

- H. J. Augustin et al.
Effect of Dopamine on Renal Hemodynamics in the Denervated Dog Kidney
- H.-W. Bauer et al.
Enzyme Immunoassay for the Prostate-Specific Acid Phosphatase (E. C. 3.1.3.2.)
- J. A. Chandler et al.
The Ultrastructure of Dog Epididymis
- K. W. Chung
Effects of LH and Oestrogen on the Growth of Feminising Testicular Tumour in Mice
- M. S. Cohen et al.
Intracellular Crystal Formation in Bacteria from Human Urines: A Contributing Factor in Urinary Calculi
- U. Dunzendorfer et al.
Polyamines, Hydrolases (PAP, LAP, SDH, PLASMIN) TSH, T₃, T₄ and C-Peptide in Benign Hyperplasia of the Prostate
- W. E. Farnsworth et al.
Interaction of Prolactin and Testosterone in the Human Prostate
- P. M. Hanno et al.
The Effect of Pre-Existing Bacteriuria on Bladder Resistance to Superinfection in the Rabbit
- H. Hisazumi et al.
The Effect of Antifibrinolysis on Renal Stone Formation
- D. Jüngst et al.
Is Urinary Cholesterol Determination a Possible Screening Test for Urological Carcinomas?
- P. Kellokumpu-Lehtinen et al.
Development of Human Fetal Prostate in Culture
- P. Pastorini et al.
The Diagnostic and Prognostic Value of Urinary Polyamine Measurement in Bladder Cancer
- A. Shapiro et al.
The Alpha-Adrenergic Blocking Effect of Prazosin on the Human Prostate
- F. Sorrentino et al.
Preventive Effect of Some Substances on Experimental Oxalic Calculogenesis in the Frog
- G. Staehler et al.
Endoscopic Applications of the Nd-YAG Laser in Urology; Theory, Results, Dosimetry
- E. Varenhorst et al.
The Effects of Orchiectomy, Oestrogens and Cyproterone-Acetate on the Antithrombin-III Concentration in Carcinoma of the Prostate
