

Errata

The change in the Prefactor Exponent with Valence for Percolation in 3 and 4 dimensions. J. A. M. S. Duarte and H. J. Ruskin, Z. Naturforsch. 35 a, 244—246 (1980).

Two misprints crept into Table 1, p. 245. They should be obvious to the interested reader but the fault deserves to be unambiguously repaired.

a) The total number of restricted valence site animals for the simple cubic lattice with 9 sites and valence 4 should read "1139421" instead of "11394221".

b) The row for the body centered cubic lattice with 6 sites should read

	6	4496	14180	15531	15587	15587	15587
instead of	6	4496	14180	15531	15531	15531	15531 .
