

**Scenario:**

Your unit has been advancing towards its objective. Your call sign is CY11. Suddenly, you become pinned down from enemy tank fire. While scanning the battlefield, you see an enemy tank dug in about 300 meters to your front. You know that you will need immediate fire support so; you begin to formulate the information you will need for a fire support request. Your grid coordinate is BN193421 and your direction to the target is 1540. The grid coordinate of the enemy tank is BN190420. After checking your SOI extract, you confirm the call sign for your ARTY support as V24.
