REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this publication. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Submit your DA Form 2028 (Recommended Changes to Publications and Blank Forms), through the Internet, on the Army Electronic Product Support (AEPS) website. The Internet address is http://aeps.ria.army.mil. If you need a password, scroll down and click on "ACCESS REQUEST FORM." The DA Form 2028 is located in the ONLINE FORMS PROCESSING section of the AEPS. Fill out the form and click on SUBMIT. Using this form on the AEPS will enable us to respond quicker to your comments and better manage the DA Form 2028 program. You may also mail, fax or email your letter, DA Form 2028, or DA Form 2028–2, located at the back of this manual direct to: Commander, U.S. Army Tank–automotive and Armaments Command, ATTN: AMSTA–AC–NML, Rock Island, IL 61299–7630. The email address is amsta–ac–nml@ria.army.mil. The fax number is DSN 793–0726 or Commercial (309) 782–0726. A reply will be furnished to you.

This manual is published in two volumes.

TABLE OF CONTENTS

		Page	Illus/ Figure
Section I.	INTRODUCTION	1	
Section II.	REPAIR PARTS LIST	1–1	
Group 01	Engine		
	0100 Dressed Engine Assembly with Container	1–1	1
	0100 Engine Lifting Eyes and Brackets	2–1	2

Approved for public release; distribution is unlimited.

TABLE OF CONTENTS (Continued)

		Page	Illus/ Figure
Group 01	Engine (Cont)		
	0101 Cylinder Block Assembly	3–1	3
	0101 Cylinder Block Assembly End Plates	4–1	4
	0101 Cylinder Block Assembly Pins and Plugs	5–1	5
	0101 Air Box Covers and Drains	6–1	6
	0101 Cylinder Head Assembly	7–1	7
	0101 Cylinder Block Assembly Cylinder Liner	8–1	8
	0102 Crankshaft, Main Bearing, Pulley, Vibration Damper and Oil Pump Drive Gear	9–1	9
	0102 Vibration Damper and Front Balance Cover	10–1	10
	0102 Crankcase Front Cover and Oil Seal	11–1	11
	0103 Flywheel Housing	12–1	12
	0103 Rear Oil Seal and Flexplate Assembly	13–1	13
	0104 Piston and Connecting Rod	14–1	14
	0105 Rocker Cover and Gasket	15–1	15
	0105 Exhaust Valve Bridge, Rocker Arm, Valve and Cam Follower/Pushrod	16–1	16
	0105 Camshaft Assembly	17–1	17
	0105 Idler Gear Assembly	18–1	18
	0106 Oil Filter Assembly	19–1	19
	0106 Oil Pan/Gasket	20–1	20
	0106 Breather and Hoses	21–1	21
	0106 Oil Filler and Dipstick	22–1	22
	0106 Oil Pump Assembly, Pressure Regulator and Relief Valve	23–1	23
	0106 Engine Oil Cooler Assembly	24–1	24
	0106 Engine Oil Sampling Valve	25–1	25
	0108 Exhaust Manifold	26–1	26
	0112 Engine Brake Retarder	27–1	27
Group 03	Fuel System		
	0301 Fuel Injector	28–1	28
	0302 Fuel Pump Assembly and Fittings	29–1	29
	0302 Electric Fuel Pump and Fittings	30–1	30
	0304 Air Cleaner Assembly and Air Filter	31–1	31
	0304 Air Intake Ducting	32–1	32
	0305 Blower Components	33–1	33
	0305 Blower Assembly Housing	34–1	34
	0305 Blower Drive Assembly	35–1	35
	0305 Turbocharger Mounting	36–1	36
	0305 Turbocharger Assembly	37–1	37
	0306 Fuel Tank Assembly	38–1	38
	0306 Check Valve, Fuel Lines and Fittings	39–1	39
	0306 Engine Fuel Lines and Fittings	40–1	40
	0306 Engine Fuel Junction Block Lines and Fittings	41–1	41
	0306 Fuel Water Separator Lines and Fittings	42–1	42
	0306 Auxiliary Fuel Tank and Accessories	43–1	43
	0309 Secondary Fuel Filter	44–1	44
	0309 Fuel/Water Separator	45–1	45
	0311 Ether Starting Aid	46–1	46
Group 04	Exhaust System		
	0401 Muffler and Pipes	47–1	47
Group 05	Cooling System		
	0501 Radiator	48–1	48
	0501 Fan Shrouds and Brackets	49–1	49
	0503 Thermostats, Cooling System Hoses and Tubes	50–1	50
	0503 Cooling System Hoses and Tubes	51–1	51
	0503 Aftercooler	52–1	52
	0504 Water Pump Assembly	53–1	53
	0504 Water Pump Drive Gear	54–1	54

UNIT, DIRECT SUPPORT AND GENERAL SUPPORT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST

Section I. INTRODUCTION

1. SCOPE.

This RPSTL lists and authorizes spares and repair parts; special tools; special Test, Measurement, and Diagnostic Equipment (TMDE); and other special support equipment required for performance of Unit, Direct Support, and General Support Maintenance of the M1074/M1075 Palletized Load System (PLS). It authorizes the requisitioning, issue, and disposition of spares, repair parts and special tools as indicated by the source, maintenance, and recoverability (SMR) codes.

2. GENERAL.

In addition to Section I, Introduction, this Repair Parts and Special Tools List (RPSTL) is divided into the following sections:

c. Section II. Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts Lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed by item name in FIG BULK at the end of the section. Repair parts kits or sets are listed separately in their own functional group within Section II. Repair parts for repairable special tools are also listed in the section.

c. Section III. Special Tools List. A list of special tools, special Test, Measurement and Diagnostic Equipment (TMDE), and other special support equipment authorized by this RPSTL (as indicated by Basis of Issue (BOI) information in DESCRIPTION AND USABLE ON CODE (UOC) column) for the performance of maintenance.

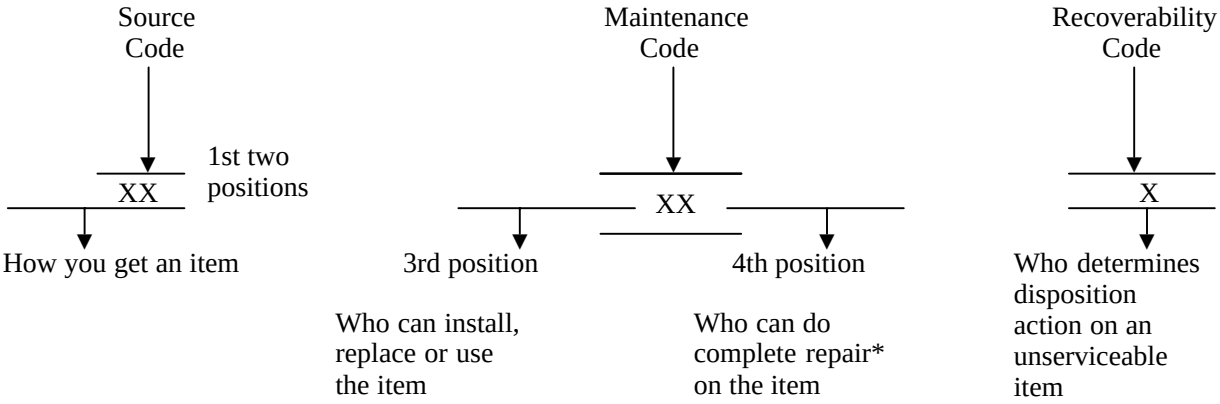

c. Section IV. Cross-Reference Indexes. A list, in National Item Identification Number (NIIN) sequence, of all National stock numbered items appearing in the listings, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

3. EXPLANATION OF COLUMNS (SECTIONS II AND III).

a. Item No. (Column (1)). Indicates the number used to identify items called out in the illustration.

b. SMR Code (Column (2)). The Source, Maintenance, and Recoverability (SMR) code is a 5-position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instruction, as shown in the following breakout:

3. EXPLANATION OF COLUMNS (SECTIONS II AND III) (CONT).

* Complete Repair: Maintenance capacity, capability, and authority to perform all corrective maintenance tasks for the ”Repair” function in a use/user environment in order to restore serviceability to a failed item.

(1) Source Code. The source code tells you how to get an item needed for maintenance, repair, or overhaul of an end item/equipment. Explanations of source codes follows:

Code	Explanation
PA PB PC** PD PE PF PG	Stocked items; use the applicable NSN to request/requisition items with these source codes. They are authorized to the category indicated by the code entered in the 3rd position of the SMR code. **NOTE: Items coded PC are subject to deterioration.
KD KF KB	Items with these codes are not to be requested/requisitioned individually. They are part of a kit which is authorized to the maintenance category indicated in the 3rd position of the SMR code. The complete kit must be requisitioned and applied.
MO- (Made at org Level) MF- (Made at DS Level) MH- (Made at GS Level) ML- (Made at Specialized Repair Act (SRA)) MD- (Made at Depot)	Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by the part number in the DESCRIPTION AND USABLE ON CODE (UOC) column and listed in the Bulk Material group of the repair parts list in this RPSTL. If the item is authorized to you by the 3rd position code of the SMR code, but the source code indicates it is made at a higher level, order the item from the higher level of maintenance.

Code		Explanation
AO-	(Assembled by org Level)	Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicated by the source code. If the 3rd position code of the SMR code authorizes you to replace the item, but the source code indicated the item is assembled at a higher level, order the item from the higher level of maintenance.
AF-	(Assembled by DS Level)	
AH-	(Assembled by GS Level)	
AL-	(Assembled by SRA)	
AD-	(Assembled by Depot)	

XA- Do not requisition an ”XA”-coded item. Order its next higher assembly. (Also, refer to the NOTE below.)

XB- If an ”XB” item is not available from salvage, order it using the CAGEC and part number given.

XC- Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer’s part number.

XD- Item is not stocked. Order an ”XD”-coded item through normal supply channels using the CAGEC and part number given, if no NSN is available.

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded ”XA”.

(2) Maintenance Code. Maintenance codes tell you the level(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR Code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following levels of maintenance.

Code	Application/Explanation
C	- Crew or operator maintenance done within organizational maintenance.
O	- Unit Maintenance can remove, replace, and use the item.
F	- Direct support level can remove, replace, and use the item.
H	- General support level can remove, replace, and use the item.
L	- Specialized repair activity can remove, replace, and use the item.
D	- Depot level can remove, replace, and use the item.

3. EXPLANATION OF COLUMNS (SECTIONS II AND III) (CONT).

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). (NOTE: Some limited repair may be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.) This position will contain one of the following maintenance codes:

Code	Application/Explanation
O	- Unit Maintenance is the lowest level that can do complete repair of the item.
F	- Direct support is the lowest level that can do complete repair of the item.
H	- General support is the lowest level that can do complete repair of the item.
L	- Specialized repair activity is the lowest level that can do complete repair of the item.
D	- Depot is the lowest level that can do complete repair of the item.
Z	- Nonreparable. No repair is authorized.
B	- No repair is authorized. (No parts or special tools are authorized for the maintenance of ”B”-coded item.) However, the item may be reconditioned by adjusting, lubrication, etc., at the user level.

(3) Recoverability Code. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR Code as follows:

Code	Application/Explanation
Z	- Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in the 3rd position of SMR Code.
O	- Reparable item. When uneconomically reparable, condemn and dispose of the item at organizational level.
F	- Reparable item. When uneconomically reparable, condemn and dispose of the item at the direct support level.
H	- Reparable item. When uneconomically reparable, condemn and dispose of the item at the general support level.
D	- Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item not authorized below depot level.
L	- Reparable item. Condemnation and disposal not authorized below specialized repair activity (SRA).
A	- Item requires special handling or condemnation procedures because of specific reasons (e.g., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. NSN (Column (3)). The National Stock Number for the item is listed in this column.

d. CAGEC (Column (4)). The Commercial and Government Entity Code (CAGEC) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplied the item.

e. Part Number (Column (5)). Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

NOTE

When you use a NSN to requisition an item, the item you receive may have a different part number from the part ordered.

f. Description and Usable On Code (UOC) (Column (6)). This column includes the following information:

(1) The Federal item name and, when required, a minimum description to identify the item.

(2) Part numbers for bulk materials are referenced in this column in the line item entry for the item to be manufactured/fabricated.

(3) In the Special Tools List section, the basis of issue (BOI) appears as the last line(s) in the entry for each special tool, special TMDE, and other special support equipment. When density of equipments supported exceeds density spread indicated in the BOI, the total authorization is increased proportionately.

(4) The statement ”END OF FIGURE” appears just below the last item description in Column 5 for a given figure in both Section II and Section III.

g. QTY (Column (7)). The QTY (quantity per figure column) indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A ”V” appearing in this column in lieu of a quantity indicates that the quantity is variable and the quantity may vary from application to application.

4. EXPLANATION OF COLUMNS (SECTION IV).

a. National Stock Number (NSN) Index.

(1) STOCK NUMBER column. This column lists the NSN by National Item Identification Number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN i.e.:

NSN i.e. (5305-01-574-1467).
NSN
NIIN

When using this column to locate an item, ignore the first 4 digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

(2) FIG. column. This column lists the number of the figure where the item is identified/located. The figures are in numerical order in Section II and Section III.

(3) ITEM column. The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

4. EXPLANATION OF COLUMNS (SECTION IV) (CONT).

b. Part Number Index. Part numbers in this index are listed by part number in ascending alphanumeric sequence (i.e., vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

(1) CAGEC column. The Commercial and Government Entity Code (CAGEC) is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

(2) PART NUMBER column. Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, and inspection requirements to identify an item or range of items.

(3) STOCK NUMBER column. This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and CAGE columns to the left.

(4) FIG. column. This column lists the number of the figure where the item is identified/located in Sections II and III.

(5) ITEM column. This item number is that number assigned to the item as it appears in the figure referenced in adjacent figure number column.

5. SPECIAL INFORMATION.

a. Usable On Code. The usable on code appears in the lower left corner of the Description column heading. Usable on codes are shown as ”UOC....” in the Description Column (justified left) on the last line applicable item description/nomenclature. Uncoded items are applicable to all models. Identification of the usable code in this publication is:

Code	Used On
074	Palletized Load System with Crane, Model M1074
075	Palletized Load System without Crane, Model M1075

b. Fabrication Instructions. Bulk materials required to manufacture items are listed in the Bulk Material Functional Group of this RPSTL. Part numbers for bulk materials are also referenced in the description column of the line item entry for the item to be manufactured/fabricated. Detailed fabrication instructions for items source coded to be manufactured or fabricated are found in TM 9–2320–364–20 and TM 9–2320–364–34.

c. Assembly Instructions. Detailed assembly instructions for items source coded tobe assembled from component spare/repair parts are found in TM 9–2320–364–20 and TM 9–2320–364–34. Items that make up the assembly are listed immediately following the assembly item entry or reference is made to an applicable figure.

d. Kits. Line item entries for repair parts kits appear in a group in Section II (see Table of Contents).

e. Index Numbers. Items which have the word BULK in the figure column will have an index number shown in the item number column. This index number is a cross–reference between the National Stock Number/Part Number Index and the Bulk Material List in Section II.

f. Associated Publications. The publications listed below pertain to the Palletized Load System and its components:

Publication	Short Title
TM 9–2320–364–10	Operator’s Manual

TM 9–2320–364–20 Unit Maintenance Manual
TM 9–2320–364–34 Direct and General Support Maintenance Manual

6. HOW TO LOCATE PARTS.

a. When National Stock Number or Part Number is NOT Known.

(1) First. Using the table of contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.

(2) Second. Find the figure covering the assembly group or subassembly group to which the item belongs.

(3) Third. Identify the item on the figure and note the item number.

(4) Fourth. Refer to the Repair Parts List for the figure to find the NSN or part number for the item number noted on the figure. The NSN and part number are on the same line as the associated item number.

b. When National Stock Number or Part Number is Known.

(1) First. Using the Index of National Stock Numbers and Part Numbers, find the pertinent National Stock Number or Part Number. The NSN index is in National Item Identification Number (NIIN) sequence (see paragraph 4a.(1)). The part numbers in the Part Number index are listed in ascending alphanumeric sequence (see paragraph 4b.). Both indexes cross-reference you to the illustration figure and item number of the item you are looking for.

(2) Second. After finding the figure and item number, verify that the item is the one you are looking for, then locate the item number in the repair parts list for the figure.

7. ABBREVIATIONS.

Abbreviations used in this manual are listed in MIL-STD-12.
