United States Patent Office.

CHARLES W. BROWN, OF NEWBURYPORT, MASSACHUSETTS.

SUPPORT OR REST FOR PRINTERS' GALLEYS.

SPECIFICATION forming part of Letters Patent No. 302,825, dated July 29, 1884.

Application filed May 31, 1883. (No model.)

To all whom it may concern:
Be it known that I, Charles W. Brown, of Newburyport, in the county of Essex and State of Massachusetts, have invented certain 5 new and useful Improvements in Supports or Rests for Printers' Galleys, of which the following is a full, clear, and exact description.

This invention consists of a rest or support for a printer's galley, constructed and ar-10 ranged for use, all substantially as hereinafter fully described, reference being had to the accompanying plate of drawings, in which-

Figure 1 is a face view and elevation of a printer's case and galley, showing my im-15 proved support or rest for the galley as attached to the case. Fig. 2 is a section on line 2.2, Fig. 1; Figs. 3 and 4, perspective views of the galley support or rest detached; and Fig. 5, a detail sectional view similar to Fig. 20 2, enlarged, with the support shown in Fig. 4.

In the drawings, A represents a printer's case, and B a printer's galley, each and both of any of the usual constructions.

C represents my improved support or rest 25 for the galley B. This support C is made of metal or other suitable material, and is provided with a slot, D, suitable to fit over a partition-wall, E, of the case A, and preferably with a leg, F, to rest upon the bottom of

a chamber or compartment, G, of the case, and 30 with a notch, H, making a shoulder for resting the edge of the galley on, as shown in Figs. 2 and 5 more particularly.

This improved support, when made of metal, can be east or struck up or formed of wire, as 35 is obvious.

Having thus described my invention, what I claim, and desire to secure by Letters Patent,

1. A support or rest, C, for a printer's gal- 40 ley, having a notch or slot, D, and a shouldered notch, H, in front of said slot D, substantially as and for the purpose specified.

2. A support or rest, C, for a printer's gal-

ley, having a notch or slot, D, and a leg, F, 45 substantially as and for the purpose specified.

3. A support or rest, C, for a printer's galley, having a notch or slot, D, a shouldered notch, H, and a leg, F, substantially as and for the purpose specified.

In testimony whereof I have hereunto set. my hand in the presence of two subscribing witnesses.

CHARLES WM. BROWN.

Witnesses:

Reuben F. Dade. GEO. M. WARNER.
