# UNITED STATES PATENT OFFICE.

HENRY W. WAGENET, OF SANDUSKY, OHIO.

## EYE-SHADE.

SPECIFICATION forming part of Letters Patent No. 307,362, dated October 28, 1884.

Application filed April 23, 1884. (No model.)

*To all whom it may concern:*

Be it known that I, HENRY W. WAGENET, of Sandusky, county of Erie, State of Ohio, have invented a new and useful Improvement in Eye-Shades; and I declare the following to be a full, clear, and exact description of the same, such as will enable others skilled in the art to which it pertains to make and use it, reference being had to the accompanying drawings, which form a part of this specification.

My invention consists in the combination of devices and appliances hereinafter specified, and more particularly pointed out in the claim.

In the drawings, Figure 1 is a plan view of a device embodying my invention. Fig. 2 represents the same with its ends fastened together. Fig. 3 is a separate view of the fastening.

My invention relates more particularly to eye-shades, and has for its object more especially means for fastening the extremities of the shade together, so that the shade may be of any size required.

In the drawings, A represents an eye-shade, constructed of any suitable pattern and material—as, for instance, of paper. *a* and *a'* rep-

resent its extremities. The extremity *a* is provided with a hook, B, secured thereto.

I do not confine myself to the precise construction of this hook as shown; but it may be made with a series of prongs adapted to be engaged with the fabric and to be secured thereto, as shown in Fig. 3. The extremity of the shade *a'* is provided with a series of perforations, *a''*, with which the hook B may be engaged, so as to make the shade of any desired size. This method of fastening the extremities affords a ready means of adjusting the length of the shade and of securing said extremities together.

What I claim is—

As an improved article of manufacture, an eye-shade consisting of the shade A, having its extremities provided, respectively, with the hook B and the series of perforations *a''*, arranged in a line along the length of the shade, substantially as described.

In testimony whereof I sign this specification in the presence of two witnesses.

HENRY W. WAGENET.
