

UNITED STATES PATENT OFFICE.

WILLIAM T. WALLACE, OF TROY, TEXAS.

HAIR-TONIC.

SPECIFICATION forming part of Letters Patent No. 386,617, dated July 24, 1888.

Application filed April 18, 1888. Serial No. 271,097. (No specimens.)

To all whom it may concern:

Be it known that I, WILLIAM T. WALLACE, a citizen of the United States, residing at Troy, in the county of Bell and State of Texas, have invented a new and useful Composition of Matter to be used as a Hair-Restorer, of which the following is a specification.

My preparation consists of the following ingredients combined in the proportions stated, viz: tincture of cantharides, one and one-half ounce; oil of cocoa, one ounce; castor-oil, one ounce; solution of ammonia, one half ounce; alcohol, one ounce; bay-rum, one-half ounce; borax, two drams; flowers of sulphur, two drams; oil of bergamot, one-half dram; olive-oil, four ounces; cologne, enough to perfume. These ingredients are thoroughly mingled by agitation, the cologne being added by preference in order to perfume the preparation.

In use the liquid preparation is applied to the head once a day until the scalp is thoroughly irrigated, and thereafter once or twice a week. By its use the hair will be prevented from falling out, as often occurs after fevers, and when the follicles are not dead a new growth of hair will be formed on bald heads.

What I claim, and desire to secure by Letters Patent of the United States, is—

The herein-described preparation for use as a hair-restorer, consisting of tincture of cantharides, oil of cocoa, castor-oil, ammonia solution, alcohol, bay-rum, borax, flowers of sulphur, oil of bergamot, olive-oil, and a perfuming substance, in or about the proportions specified.

WILLIAM T. WALLACE.
