

New York City Stalled

Natsios Young Architects

17 December 2009

Attached is a list of "stalled projects" in New York City, 13 December 2009, some 600 of them officially designated and multiples of those in the pipeline:

http://www.nyc.gov/html/dob/html/guides/snapshot_report.shtml

Details of each property available from the NYC Building Information System:

<http://www.nyc.gov/html/dob/html/bis/bis.shtml>

Stalled projects are often claimed to result from economic forces. Other causes not readily admitted are building code violations of construction safety, public safety and health; violations of landmarks preservation regulations; law suits by aggrieved neighbors; labor disputes; indictment of developers, construction companies and others involved in the projects: <http://tinyurl.com/ykjaym9>

A stalled residential project in Brooklyn, cellar water mosquito-infested, a public hazard despite seven safety and health violations and fine:

Classifying construction projects as "stalled" rather than dead is an innovation to ease the stigma of economic downturn in property development and to assure projects will be completed rather than abandoned to become public hazards.

New York City government has included stalled projects in an application for federal stimulus funding along with a standard list of legacy wheedlings. The hope is that by promising the federal government that stalled projects can become a source of badly needed jobs and housing for the down-and-out, these remnants of a boom period can be reborn as yet another forlorn hope for the hopeless while enriching the construction industry and who else but banks happy for bottom-feeding opportunities.

No example of deep stallage exceeds that of the World Trade Center's glacial pace of bountiful fund-raising, squabbling, planning and design, multiple revisions of planning and design, extortionings, law suiting, whining, outrage, weeping and crocodile tearing, finger-pointing, prayer and memorial ceremonies galore, and whatever else will keep the public's attention year after decade and likely to extend beyond a century if like old and new world precedents.

A welter of other sacred and profane stallages around the world, led by the World Monuments Fund, show well the virtues of never completing an ambitious project while enjoying the benefits of prolonged begging for aid to "finish" bedraggled icons of home-bred culture as in Barcelona:

Mimicking the ancients' model in New York City, the Cathedral of Saint John the Divine is a prime monument to prolonged stallage now over a century old.

Numerous stalled structures in New York City have come from official action following fatal accidents as shown in this city-owned wrapped remnant of a crane collapse:

Meanwhile beware walking near one of the official derelicts. Public safety and health are not addressed despite promises of the NYC Mayor and Building Department -- the latter's own headquarters is wrapped in protective scaffolding in recognition of city-wide policy of stalled correction of neglect:

And across the street from Building Department headquarters and a block from the Mayor's Office in City Hall is a classic landmark of stalled official dereliction:
