An alarm system connecting these rooms with the guard post just inside the main entrance to the main building is in operation. No individual who is not connected with the MFS is permitted to enter the main building unless personally escorted by an agent. The agents themselves have free access to the entire building with the following exceptions: the ordnance room, that section of the personnel department where dossiers and credentials are maintained, and the communications section.

In addition, the ordnance room has on hand approximately 20 machine pistols, Soviet model "M38", four (4) light machine guns, Soviet make, model unknown, and six (6) hunting rifles, make unknown, for the personal use of high ranking officials. An unknown quantity of ammunition for all the aforementioned weapons is also maintained in the ordnance room.
