Subject: SANACC Studies on Psychological Warfare

1. By virtue of a decision of the National Security Council, approved by the President, the responsibility for planning covert psychological warfare organization and operations of the United States Government have been centered in CIA (NSC 10/2). Therefore, SANACC should no longer concern itself with the problem of planning in the covert field.

2. I understand that the SANACC subcommittee dealing with psychological warfare has been planning for overt as well as covert wartime operations. The Department, with the responsibility for action located in P, is preparing a position on the question: "Shall responsibility for the operation and planning of white in wartime be located in the State Department?" It is intended that this departmental position will be sent to the National Security Council for approval. Until a decision is reached in NSC and approved by the President the SANACC subcommittee should continue its planning of overt activities in wartime.

As quickly as the decision in 2 above is reached you will be informed in order that you may take appropriate action in SANACC with regard to the subcommittee referenced.
