Joaquin,

I have consulted Tom Jones (also copied on this mail) who is the project manager for the QIT project in Doha, Qatar. The QIT equipment has been consolidated to a single storage area. Please find attached the presentation showing that the crating on some of the boxes is in urgent need of replacement and it is realistic to say that the expected life of crating in outdoor storage is 1 year. Although the crating has done a good job, the Houston weather is a tough environment. Since the units have been title transferred and our customer has risk of loss, it has been GE's recommendation that they issue a PO to the crating company to do the replacement of some of the boxes. We are having this discussion with the customer as we speak.

We confirm however that the equipment is available for inspection and Tom has confirmed that he is happy to facilitate in Houston.

Tom Jones contact details are: T: 281-864-2646 / Cell: 281-380-2802 or Fax: 281-864-2116

Let us know how you want to proceed.

Thanks and best regards,

CJ

Thanks for your note CJ, I know what you are saying about boxes, etc however our customer would like to inspected and our strong point is that those units are ready to ship. We are ready anytime the sooner the better.

I really appreciate your cooperation CJ with us.

Thanks for your support.

Joaquin

Dear Joaquin,

Thanks for the note. I'm checking this with Tom Jones who has been the project manager on this project. My experiences is that you will see two LM2500+ packages and a lot of boxes only. When do you want to come?

Thanks..CJ

CJ I'll hope you are doing great!
How can we proceed to see the units?
We are interesting in both units.

Could you help me to arrange the visit to the equipment?

Thanks

Joaquin
