

DERWICK ASSOCIATES S.A.

Operators and Maintainers Training Scope for 4 x GE TM2500 and 1 x GE LM25000

Derwick Associates S.A will deliver a Turbine training guide translated into Spanish and reproduce the material for fifteen (15) students. Derwick Associates S.A will deliver one master hard-copy set of the material, along with one electronic copy containing the associated software files (in MS Power Point format).

Derwick Associates S.A will develop a comprehensive Training Plan including the following:

1. Training Manual

Derwick Associates S.A will develop a Training Manual translated into Spanish containing training material for the following topics:

2. Training Presentation

Derwick Associates S.A instructors will present training to the plant personnel. The training will include a combination of classroom discussion and hands on training. The existing control system at the site will be utilized. The training session includes the following:

- Conduct two weeks of classroom training (in Spanish).
 - Two weeks (80 hours) of classroom training for fifteen (15) people.
- Provide a qualification sheet to each trainee of the systems review with sign off blocks.
- Provide a written test to each trainee at the end of each week.
