---

Scott,

If it was not clear in Sudhir's email, below is the contact information for GDF:

**Florent BERGERET**

Responsable Développement & Intégration  
Production Electricité France - Pôle Thermique

7, Rue Emmy Noether  
93400 Saint-Ouen  
Tél. +33 (0)1 49 48 43 40  
Mob. +33 (0)6 27 28 48 59  
[florent.bergeret@gdfsuez.com](mailto:florent.bergeret@gdfsuez.com)  
[www.gdfsuez.com](http://www.gdfsuez.com)

In addition, attached is the scope document we discussed. I am also attaching the GDF GA drawing.

As stated previously, the exhaust stack and CEMS equipment were removed from the scope since they were not complete. Our understanding is that these items could be finished if you have an interest in purchasing this scope. We excluded them so there would be no surprises. After talking to Sudhir this morning, GDF included these items in the purchase price; however, these items are not complete and were placed on manufacturing hold by GDF. Therefore there is an opportunity to acquire incremental scope for the same purchase price.

Please feel free to call me.

Best regards,

John March
