Response to Amtrak's Preliminary Design Review Comments - 50%  
Construction Documents

Dear Mr. Caso:

Amtrak reviewed the subject submission as provided with your letter dated August 22, 2014 and has no further comments. A preliminary engineering agreement and force account agreement are not required to advance the project. If the boundaries of the project or the foundations of the proposed development change in any way during the design and construction of the project, Amtrak must review and approve the changes to determine that there still is no significant impact on Amtrak's operations.

If you have any questions concerning this matter please contact Michael Kolonauski, Project Development Officer, at 215-349-1127.

Sincerely,

Earl Watson III  
Director I&C Projects
