CLASSIFIED TABLE OF CONTENTS

IT is not perhaps commonly realized that a general Encyclopaedia is more than a mere store-house of facts. In reality it is also a systematic survey of all departments of knowledge. But the alphabetical system of arrangement, with its obvious advantages, necessarily results in the separation from one another of articles dealing with any particular subject. Consequently the student who desires to make a complete study of a given topic must exercise his imagination if he seeks to exhaust the articles in which that topic is treated. Though the Index proper (pp. 3-878 of this volume) will give him assistance in obtaining information under headings which are not themselves the titles of articles in the Encyclopaedia, he will still find it of the greatest service to have a bird's-eye view of all the articles upon his subject.

The ensuing pages of this volume contain what we believe to be the first attempt in any general work of reference at a systematic subject catalogue or analysis of the material contained in it. If the student turn, for example, to the section "Art" (p. 884) he will at once obtain a list of all the articles on architectural subjects, including the brief dictionary articles which are a special feature of the *Encyclopaedia Britannica* (Eleventh Edition). He will find subjoined a list of the biographies of architects. On pp. 885-888 are similar classified lists for Music, Painting and Engraving, Sculpture, the Minor Arts, the Stage and Dancing. The lists of biographies afford the reader access to information of a kind which cannot be given in subject articles and to which no index can be a satisfactory guide. In each section the main article or articles appear at the beginning in italics, *e.g.* (p. 883) *Anthropology, Ethnology.*

It is hoped that by means of this Classified List of Articles the student will find that he possesses not only a general encyclopaedia, but also for all practical purposes a complete set of encyclopaedias on special subjects.

The classification of so great a mass of material must necessarily be to some extent arbitrary. Too minute a subdivision might easily confuse the reader and decrease the practical usefulness of the Table. The principle adopted has been to classify articles under as few general headings as possible, and those the most natural and obvious—*e.g.* Art, Geography, History, &c.

In order to keep the Table within reasonable compass the duplicating of articles in several sections has been as far as possible avoided. Thus the article "Charlemagne" in the History section might have appeared in any one or all of the subsections Europe, France, Germany, Roman Empire, Franks. It was, however, decided to group together under the heading

Digitized by Google

"Franks" all articles relating to the Frankish Empire up to the period when it lost its unity, and with these the article "Charlemagne" was naturally included. Similarly the article "Electricity Supply" might have been placed in any one or all of the sections Engineering, Industries and Commerce, Law, Sociology. It was felt, however, that its proper place was beside the other articles which appear in the subsection Electricity under the general heading Physics.

Readers should note in connexion with the question of duplication that the sections entitled History and Geography are mutually complementary. The vast majority of articles under topographical headings contain the historical information appropriate to the county, district or town which they describe. Similarly the sections Archaeology and Anthropology are interdependent, referring respectively to the ancient and the modern divisions of the same science. As regards Archaeology all the articles on the sites will be found under Geography, while the articles under Anthropology must be supplemented by those in the section Religion § *Comparative*.

It should further be understood that this classification does not claim to exhaust the articles in the *Encyclopaedia*, but rather to collect under the obvious headings, main and subsidiary, those articles which are necessary to the understanding of a given subject.

Further guidance as to the arrangement of the sections is given on pp. 881-882.

THE EDITORS.

LONDON, *May* 31, 1911.
