Microsoft® Windows NT® Versie 4.0

Lijst met compatibele hardware

De volgende computers en randapparaten zijn met succes getest op compatibiliteit met Windows NT 4.0. Het kan voorkomen dat computers verkocht worden met randhardware die nog niet wordt ondersteund door het besturingssysteem Windows NT of waarvoor een stuurprogramma (driver) vereist is dat wordt geleverd door de producent. Niet iedere computer en/of apparaat is getest in alle mogelijke configuraties. Raadpleeg bij het installeren van Windows NT 4.0 de Release-info voor aanvullende informatie over compatibiliteit.

Als bijlage is hierin opgenomen de Windows NT 3.51 Uniprocessor Computers Lijst met compatibele architectuur, waaronder de x86, MIPS®, Digital Alpha en PowerPC™ platforms. Op alle computersystemen die in deze lijst voorkomen moet het mogelijk zijn Windows NT 4.0 te gebruiken. Mocht u problemen tegenkomen bij het uitvoeren van Windows NT 4.0, wordt u verzocht het probleem te rapporteren. U doet dit door het invullen van het bestand PROBREP.TXT, dat te vinden is in de map i386 op de Windows NT 4.0 cd-rom of op de Windows NT 4.0 Setup-diskette nr. 2. Voor het opsturen van dit bestand vindt u instructies in PROBREP.TXT. Als u vragen hebt over of problemen met het rapporteren, neemt u contact op met ntbug@microsoft.com.

Voor items in de lijst die voorzien zijn van voetnoot¹ is een stuurprogramma (driver) vereist dat u kunt vinden in de map \DRVLIB op de Windows NT 4.0 cd-rom.

Toekomstige bijgewerkte versies van deze lijst zullen beschikbaar worden gesteld op het World Wide Web onder het adres <http://www.microsoft.com/hwtest>.

De volgende adapters voor videoweergave zijn getest op Digital Alpha-systemen. De meeste gangbare scan-frequencies worden ondersteund. Het beeldscherm moet dezelfde resolutie en scan-frequencies hebben als de adapter. Raadpleeg de Windows NT 4.0 Release-info voor meer informatie. Voor sommige adapters is een firmware-uitbreiding vereist. Neem contact op met uw leverancier voor meer informatie.

De volgende adapters zijn getest op Motorola PowerPC-systemen met firmware revisie 3.04. Neem contact op met het Motorola verkoopkantoor als u deze firmware revisie nodig hebt. De meeste gangbare scan-frequenties worden ondersteund. Het beeldscherm moet dezelfde resolutie en scan-frequenties hebben als de adapter. Raadpleeg de Windows NT 4.0 Release-info voor meer informatie. Voor sommige adapters is een firmware uitbreiding vereist. Neem contact op met uw leverancier voor een lijst van ondersteunde adapters voor andere PowerPC-systemen.

Adapters die niet in bovenstaande lijst voorkomen, worden geacht te werken bij gebruik van volgende ondersteunde chipsets. Als de adapter een van de ondersteunde interne chipsets heeft, kunt u de adapter automatisch laten detecteren en het vereiste stuurprogramma laten installeren. In elk ander geval installeert u de adapter eerst als Standaard VGA, en selecteert u vervolgens het overeenkomende stuurprogramma in het onderdeel Weergave van het Configuratiescherm. U kunt ook de optie Diskette gebruiken.

Het gebruik van 8-bits netwerkadapters in combinatie met Windows NT is niet aan te raden. Deze adapters leveren mindere prestaties en ze zijn ook niet meer op grote schaal verkrijgbaar. De reden dat ze toch in de lijst staan is dat er wel stuurprogramma's voor bestaan. Bovendien is het niet ongebruikelijk dat een bedrijf nog enige tijd met oudere hardware blijft werken voordat wordt overgegaan op de aanschaf van moderne hardware.
